COUNTRY	East Germany	REPORT	
SUBJECT	Wittstock Airfield	DATE DISTR.	21 June 1955
		NO. OF PAGES	2
DATE OF INFO.		REQUIREMENT NO.	RD
PLACE ACQUIRED		REFERENCES	25X1
DATE ACQUIRED		This is UNEVALUATED Information	

SOURCE EVALUATIONS ARE DEFINITIVE. APPRAISAL OF CONTENT IS TENTATIVE.

1. Radio/Radar:

25X1

- a. A Token and a Fishnet were located at MR 357 971. This installation appeared to have been in operation throughout normal daylight hours, irrespective of whether flying was being undertaken from the nearby airfield.
- b. Two VHF Cones, each surmounting a wooden mast approximately 8-10 meters in height, were situated at MR 333 966. There was an interval of approximately 50 meters between the two masts, each of which were secured by two pairs of guy wires. In between the bases of the masts a 2-axled radio van was parked from which a single pair of temporary telephone cables led off in a northeasterly direction towards the airfield.
- c. A Kniferest was located at MR 347 972. This radar appeared to operate mostly when aircraft were airborne from the airfield.
- d. The previously reported unidentified Yagi, previously observed in various positions in the southwestern corner of the airfield, has not been observed during the period.

2. Flying Activity:

Throughout the period there has been very little flying undertaken by aircraft on Wittstock airfield. Over a period of 17 days' observation the average daily total of sorties by MiG 15's was 5. Two MiG 15's fitted with auxilliary wing tanks, were observed airborne almost daily throughout the period carrying out circuits and landings.

25X1

3. AA Defenses:

No changes have been apparent in the deployment of the 6 x 37 mm Bofors type AA guns situated on the western perimeter of the airfield adjacent to the western end of the runway.
